

AI Project Learning Summary

Student: Li Xiaoming Date: 2026-08

This report summarizes my AI learning project on prompt engineering.

Project Overview:

I designed a prompt library for creative writing and image generation, covering 30+ scenarios with structured prompts and evaluation criteria.

Implementation:

Built a prompt template system and tested it with generative AI tools.

Achievements:

Generation quality improved by about 40% after iterative optimization.
Won second prize in the school AI challenge.

Reflection:

Learned how to decompose complex tasks and evaluate AI outputs.
